December Monthly Webinar
December 13, 2018

QUESTIONS & ANSWERS

How do you get the Coordinator Role assigned for IPASS?

Talk to your district technology coordinator. If this individual is unable to help, please email our SDE helpdesk support@sde.idaho.gov

How many people can we send to the 2018 Assessment & Accountability Roadshow? Most attendees cannot stay all day, just specific sessions pertinent to their assessment.

Please register any/all that should attend. If a staff member will not attend the entire day, email Danielle Taylor and let us know so we can accommodate lunch counts.

What if a student withdraws from the school and does not register to any other school? Are the school districts still held accountable for those students?

Schools/Districts are accountable for student achievement (proficiency) that enroll before the 56th day of school and remain enrolled through the first Friday in May. Any student enrolled after the 56th day should still be tested, and the school/district will be accountable for participation.

What if a student is gone only ten (10) days or two (2) weeks, is the student still considered continuously enrolled?

Students that are enrolled, but absent, are still considered continuously enrolled. We do not exclude students for absences.

Does the SDE calculate student accountability for each LEA or will the LEAs have collect documentation to upload for appeals?

The SDE will use the districts/school calendars submitted to Public School Finance for calculating the first day of school. Please make sure calendars and ISEE student enrollment information is accurate.

Where is the link to the Edmodo group?

Visit the Edmodo website and then go to Join Group and enter the current code. The code changes every 2 weeks so make sure you have the current code. You must have an Edmodo account to join a group.

Where is the link to the registration for the SAT Bulk Registration Webinar?

The link to the SAT Bulk Registration Webinar will be emailed to SAT contacts and Cc'd to District Test Coordinators. We will also publish the link in our next newsletter and on our website.

Is there a way to check a LEAs WIDA ACCESS 2.0 initial material order went through?

We received a summary report and will be in touch with any district for whom we notice a discrepancy in materials and LEP enrollment. If you have questions, please email us.

Our folks are worried about the October baseline data collection for the Science Alternate Assessment. Is this still required and will these pieces of evidence need to be uploaded in January when they can get into IPASS?

Baseline artifacts are not required to be uploaded, but teachers will enter the score for the baseline artifact they collected in October when the site opens to teachers in January.

Will the new IRI training be recorded so attendees at the 2018 Assessment & Accountability Roadshow do not have to skip half of the state assessment training because we are a pilot school?

The IRI Training is geared toward teachers using the data to inform classroom instruction. Districts/schools participating in the pilot and should consider sending teachers, Title 1 coordinator or RTI coordinator. We added the IRI training to our roadshow to save costs and maximize staff time.
